Cuddalore, Tamilnadu - 607001, India

OBJECTIVE

As a passionate and dedicated IT graduate with strong skills in networking, programming, and software development, I am seeking an opportunity to leverage my knowledge in CCNA, project development, and Python to contribute to innovative solutions. Eager to apply my technical expertise and problem-solving abilities to a dynamic team, I aim to enhance business operations through creative technological solutions and continuous learning.

EDUCATION

• LOYOLA INSTITUTE OF TECHNOLOGY

B.Tech Information Technology

◦ GPA: 8.1

06/2020 - 06/2024

Chennai, India

EXPERIENCE

• V5 GLOBAL SERVICES PVT LTD - BHARTI AIRTEL

Network Engineer – Change Management

2 Years

Chennai, India

- Configured and managed GPON OLT platforms including Nokia Alcatel, Nokia Altiplano, Huawei, ZTE, and Tejas for FTTH broadband service provisioning and troubleshooting.
- Performed BRAS configuration and subscriber management on Cisco routers, including service activation, routing updates, and authentication-related changes.
- Executed QFX switch configuration and fabric-related activities using Juniper Apstra for network infrastructure management.
- Worked on L2/L3 network configurations including VLAN provisioning, IP allocation, trunk/access port configuration, static routing, and connectivity validation.
- Monitored network health and service availability using NOC monitoring tools, proactively identifying and resolving network faults and service degradation.
- Troubleshot routing, switching, uplink, packet loss, latency, and subscriber connectivity issues during planned and emergency maintenance activities.
- Handled Incident Tickets (TT), Service Requests (SR), escalation management, and coordinated with backend/NOC teams for quick issue resolution within SLA timelines.
- Performed end-to-end validation including ping tests, trace routes, ONT status verification, and service health checks after network changes.
- Automated service activation and operational tasks using Automation Anywhere (A360), improving process efficiency and reducing manual intervention.
- Supported FTTH network operations involving ONT provisioning, broadband activation, bandwidth modification, and customer migration activities.
- Maintained network documentation, change records, and technical reports for audit, troubleshooting, and operational tracking purposes.

SKILLS

- **Networking:** TCP/IP, OSI Model, Subnetting, IPv4/IPv6, VLANs, STP, EtherChannel, DHCP, DNS, NTP
- **Routing and Switching:** OSPF, RIP, IS-IS, EIGRP, BGP, MPLS, Inter-VLAN Routing, Layer 2/Layer 3 Switching
- **Network Operations:** Incident Management, Change Management, RCA, SLA Monitoring, Fault Isolation, Ticket Handling
- **Service Provider Technologies:** PPPoE, BNG/BRAS, QFXSwitchING, OLT, MPLS
- **Cloud and Automation:** AWS Networking, Azure Networking, Python, Ansible, Linux, REST APIs
- **Tools:** Cisco Packet Tracer, GNS3, EVE-NG, ManageEngine, BMC Remedy

SOFT SKILLS

- Analytical Thinking / Problem Solving
- Quick Learner / Adaptability
- Team Collaboration
- Time Management / Project Execution

CERTIFICATIONS

- **THE FUNDAMENTALS OF DIGITAL MARKETING**
- **CISCO INTRODUCTION TO CYBERSECURITY**
- **CISCO CCNAV7 INTRODUCTION TO NETWORKS**
- **CISCO CYBERSECURITY ESSENTIAL**
- **IMPLEMENTING FACEBOOK API**
- **CISCO INTRODUCTION TO PACKET TRACER**
- **JAVA FULL STACK**

PROJECTS

- **Climate Change Impact Analysis in Agriculture**

Role: Data Analysis | Tools: Research, Data Collection, MS Excel

- Studied the impact of rising temperature and climate variability on crop yields and livestock
- Recommended adaptive agricultural processes to reduce climate risks and improve sustainability

- **AI Nutritional Analyzer – Fuelling Healthier Lifestyle**

Role: Developer | Tools: Python, ML, Pandas

- Developed an AI-based tool to analyze daily food intake and nutritional content.
- The system evaluates calories, proteins, vitamins and suggests improvements for a balanced diet.
- Aims to promote healthier eating habits using modern dietary analysis and awareness tools.

- **ANDROID BASED ONLINE VOTING SYSTEM**

Android Based Project

- This application provides is a new technique of casting votes using mobile phones.
- Android voting system is an application developed for android devices to deploy an easy and flexible way of casting votes anytime and from anywhere.

- **SPECULATING FUTURE STOCK PRICE IN STOCK MARKET**

Machine Learning Based Project

- Designed and effectual a machine learning-based stock market prediction model leveraging historical market data, technical indicators, and sentiment analysis.
- This project demonstrated my proficiency in data analysis, machine learning algorithms, and financial forecasting.

COMPLETED JAVA FULL-STACK DEVELOPMENT AND SOFT SKILL

COMPLETED JAVA FULL-STACK DEVELOPMENT UNDER TALENTNEXT, WIPRO

COMPLETED JAVA FULL-STACK DEVELOPMENT IN BESANT TECHNOLOGIES

COMPLETED CCNA IN BESANT TECHNOLOGIES
